

Marie-Josée Privyk Speaks at Transform USA and Responsible Business USA Virtual Conferences

Novisto was proud to be a Bronze Sponsor of the [Transform USA 2020](#) and [Responsible Business USA](#) virtual conferences organized by Reuters Events. The events aimed to bring together CSOs, CPOs and ESG-minded investors to share their latest insights and tangible strategies into how they are helping deliver the required transformation of business for a sustainable, circular, and inclusive future post Covid-19.

Our Head of ESG Innovation and Client Success, Marie-Josée Privyk, was interviewed on the digital transformation of ESG. A recording of the conversation can be viewed below.

“The Transform USA and Responsible Business USA conferences were all about placing sustainability not only at the heart of the US recovery, but at the heart of corporate strategy,” said Marie-Josée. “They were the perfect platform to share our insights about the ways in which AI-enabled software can help address the challenges corporate executives face in managing, and reporting on, their material sustainability issues.”
